ABOUT ME

Final-year (Expected 2027) Electrical and Electronics Engineering student with a strong passion for software development, embedded systems, IoT, and industrial automation. Skilled in Java, Python, Embedded C, PLC programming, and ESP32-based development, with hands-on experience building practical engineering projects and automation solutions through internships and self-driven learning. Committed to continuous growth toward a career as a Software and Embedded Systems Engineer.

EDUCATION

Bachelor of Engineering (B.E.) – Electrical and Electronics Engineering

Expected 2027

NPR College of Engineering and Technology, Natham, Dindigul

WORK EXPERIENCE

PLC Automation Intern — Sri Vari Innovative Automation Solutions

Jul 2025 – Aug 2025

Madurai District, Tamil Nadu

- Completed one month of industrial training in PLC-based automation
- Performed PLC panel wiring and electrical troubleshooting
- Developed Ladder Logic programs using Omron PLC
- Designed Human Machine Interface (HMI) applications
- Worked with Omron and Siemens PLC systems, and learned industrial automation workflow and motor control systems

PROJECTS

Smart Landmine Detection Robot

ESP32, Bluetooth, Arduino IDE

- Developed an ESP32-based robotic system capable of detecting buried metallic objects
- Implemented Bluetooth-based wireless control with real-time hazard alerts

Smart Environmental Monitoring System

ESP32, IoT, Sensors

- Built an IoT-based system to collect and monitor temperature and humidity data in real time

PLC-Based Motor Control & Automation System

PLC, Ladder Logic, Omron

- Designed PLC ladder logic for industrial motor control and simulated manufacturing automation processes

SKILLS

- | | | |
|------------------------------------|---------------------------|-------------------|
| • Java | • Python | • C |
| • PLC Panel Wiring & Motor Control | • Power & Control Systems | • IoT Development |
| • Ladder Logic Programming | • MATLAB | • HMI Development |

CERTIFICATIONS

- MATLAB for Electrical Engineering Applications – AB Technologies
- Industrial Automation Using PLC – Shree Technologies, Coimbatore

ACHIEVEMENTS

- Completed an industrial internship in PLC Automation
- Built five engineering projects across Embedded Systems, IoT, and Automation
- Designed and developed an ESP32-based Smart Landmine Detection Robot
